

Zocom Limited.

HOSPITALITY FOOD AND TRAVEL INDUSTRY PPE SOLUTIONS

WE BELIEVE IN KEEPING YOU SAFE

About Us

1995 - The Beginning

Zocom Ltd was established to deal with general supplies, marking the start of our journey in the safety industry

2001 - Specialization

Recognizing an urgent need in occupational health and safety, we dedicated ourselves to providing professional safety solutions

Present - Growth and Excellence

Today, we've expanded our operations with more staff and enhanced systems, becoming a leader in safety equipment distribution

Our Mission

To provide top-quality safety solutions while maintaining the highest standards of professionalism and customer service in the industry.

Zocom Limited.

WE BELIEVE IN KEEPING YOU SAFE

Why Choose Us

- 01** Over 20 Years of Industry Experience
- 02** East & Central Africa Coverage
- 03** Expertise in Occupational Health & Safety
- 04** Trusted by Leading Organizations
- 05** Partnership with Global Brands
- 06** Customer-Centric Approach
- 07** Compliance with Global Standards
- 08** Comprehensive Safety Solutions

Safer Together

At Zocom Limited, we don't just supply quality products. We are a great resource for knowledge to help you achieve a SAFER and HEALTHIER working environment which for you means – minimised lost time incidents, managed operational risk to secure your business continuity.

Our Safer Together Guide

To increase productivity and cost effectiveness, employees must be able to work comfortably and safely, being protected from a broad spectrum of possible hazards. Use our Zocom 'Safer Together' Guide to identify the right gear for the right task.

Other Industries We've Served:

- Oil and Gas
- Healthcare and Hospitals
- Construction and Civil Engineering
- Agriculture & Agro-chemicals
- Transport & Logistics
- Manufacturing & Industrial
- Government & Public Institutions
- Education & Research Institutions
- Retail Outlets
- Corporate Facilities

Head Protection

In the hospitality, food, and travel industries, head protection is a critical yet often overlooked component of workplace safety. These sectors involve a wide range of environments from busy kitchens and food processing areas to transport hubs and hotel maintenance zones each presenting unique hazards.

Hair Nets

Chef Hat

Bouffant Caps

Skull Caps

Safari Hats

Nomad Safari Cap

Head Protection in Food Production Facilities

In food manufacturing or industrial kitchens, workers may be exposed to mechanical equipment, hot surfaces, or low-clearance areas.

In such settings, bump caps (lightweight headgear with an internal shell) are used to protect against minor head injuries like bumps, scrapes, or accidental knocks without the bulk of a hard hat.

Bump Cap

Role-Specific Headwear

- Chef hats signify professionalism and hierarchy in the kitchen.
- Color-coded caps may be used to distinguish roles (e.g., cleaners, bakers, cooks) or zones (e.g., allergen-free areas), supporting food safety protocols.

NOTE:

Staff responsible for cleaning, waste handling, or maintenance in hospitality settings may occasionally require more robust head protection when working near equipment or in utility spaces.

Eye And Face Protection

In the hospitality, food, and travel sectors, eye and face protection is essential for shielding workers from common hazards like hot oil splashes, steam, cleaning chemicals, and flying food particles. Proper protective gear helps prevent injuries such as burns and chemical irritations, while also ensuring compliance with health and safety standards. This not only promotes a safer, more hygienic work environment but also boosts staff confidence and maintains high levels of professionalism.

MURUA 1

Description

Lightweight hygienic cap designed for comfortable all-day wear.

Application

Ideal for chefs, kitchen staff, and food handlers to maintain hygiene standards.

RUIZ 1

Description

Breathable mesh cap with adjustable fit for high-temperature environments.

Application

Suitable for bakers and pastry chefs working in hot bakery settings.

BRAVA 2

Description

Durable cap with reinforced stitching and secure closure.

Application

Best for cleaning crews, maintenance staff, and workers operating near boilers or high-heat equipment in food service environments.

VISOR

Description

Transparent face visor offering splash protection and visibility.

Application

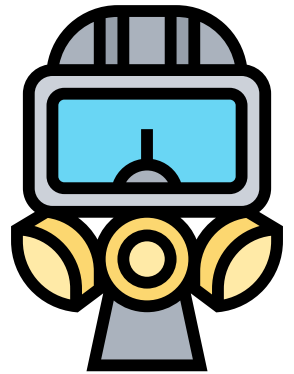

Used by servers or front-line kitchen staff to prevent contamination while maintaining customer interaction.

Zocom Limited.

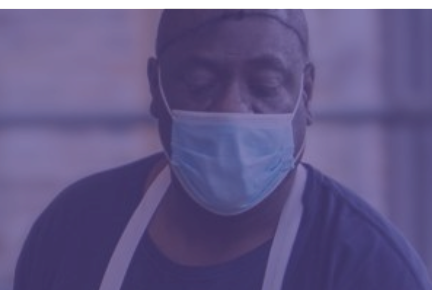

WE BELIEVE IN KEEPING YOU SAFE

Respiratory Protection

Respiratory Protection Equipment (RPE) is essential for safeguarding workers in kitchens, food processing, cleaning, laundry, and transport settings from airborne hazards like dust, steam, chemicals, and pathogens.

RPE either filters contaminated air or provides clean air, depending on the exposure level. Proper selection ensures safety during food prep, deep cleaning, confined space sanitation, or chemical handling in hospitality and travel environments.

Respiratory Protection

Dust Mask

Description

A lightweight, basic mask designed to filter out non-toxic dust and particles.

Protection

Ideal for use during general cleaning, food packaging, or light maintenance tasks where dust or dry particles are present.

HM11001U

Description

A form-fitting protective mask with enhanced filtration and secure ear loops.

Protection

Suitable for environments involving frequent sanitation or exposure to cleaning agents, helping protect against fine particles and mild fumes in food prep or service areas.

KN95 MASK

Description

High-filtration mask offering a snug fit and multi-layered protection.

Protection

Best for food handlers and staff working in high-risk or enclosed areas—helps prevent inhalation of airborne particles, bacteria, and viruses, supporting hygiene and health safety.

DISPOSABLE MASK WITH VALVE

Description

Single-use mask equipped with a built-in valve to ease breathing during prolonged use. Single-use mask equipped with a built-in valve to ease breathing during prolonged use.

Protection

Suitable for cleaning crews or staff working in hot kitchens or high-moisture zones—reduces heat buildup while offering protection from non-oily particulates and light fumes.

Ear Protection

While not as commonly highlighted as in heavy industrial settings, ear protection in the hospitality and food industry is still important in certain roles and environments. Workers operating in high-noise areas such as commercial kitchens, industrial dishwashing zones, food processing units, and boiler rooms are exposed to continuous sounds from equipment like mixers, grinders, extractors, and industrial ventilation systems.

Prolonged exposure to elevated noise levels—often above recommended safety thresholds—can lead to hearing fatigue, stress, and long-term hearing damage. To counter this, appropriate ear protection such as earplugs, earmuffs, or noise-dampening headsets should be provided, especially in back-of-house operations.

For staff working in dual-function roles—such as cleaners or maintenance personnel moving between quiet and noisy zones—reusable or easy-to-wear ear protection is ideal. Providing the right ear protection not only supports worker safety but also ensures better focus, reduced fatigue, and overall compliance with occupational health standards.

Reusable Ear Plugs

Disposable Ear Plugs

Conicfit earplugs

Foot Protection

Foot protection safety involves using appropriate footwear and accessories to safeguard against workplace hazards that could injure the feet. This includes a variety of footwear types, such as safety boots, shoes, and overshoes, each designed for specific risks like falling objects, sharp objects, chemicals, heat, and slippery surfaces.

Paris 51003 (Sisi)

Description

Designed for the food and hospitality industry. Offering top-tier slip resistance, comfort, and hygiene-focused features for demanding work environments.

Bova 9005

Description

Perfect choice for food and hospitality settings. Offering excellent slip resistance, all-day comfort, and hygiene-focused features for busy environments.

Venice 51002 (Sisi)

Description

Ideal fit for the food and hospitality industry—offering superior slip resistance, comfort, and hygiene-ready features for demanding work environments.

Dolce (Safety Jogger)

Description

Perfect for the food and hospitality industry, the Safety Jogger DOLCE combines HACCP compliance, slip resistance, and all-day comfort to keep teams safe, fresh, and focused in fast-paced environments.

Sonic (Safety Jogger)

Description

Waterproof, ESD-safe shoes with strong grip, posture support, and a metal-free toe cap—ideal for medical and cleaning environments.

Bestlight (Safety Jogger)

Description

Ultra-light, metal-free clogs with a secure grip, easy to clean, UV/chemical sterilizable—ideal for medical, cleaning, food, and catering industries.

Surchpe

Description

Made from lightweight, waterproof material with a snug elastic fit, these overshoes are ideal for kitchens and food-safe zones to block dirt and contaminants, ensuring hygiene and compliance.

DT301Y

Description

Disposable anti-static chemical protective overboot 3PB type, waterproof coverall, offering good support and an anti-slip system

Poseidon gumboot (Safety Jogger)

Description

With PVC outsole, slip resistance, a steel toe cap, antistatic and waterproof features Oil and fuel resistance on the outsole and heel energy absorption adds to your safety Perfect for multiple industries and environments.

Hercules gumboot (Safety Jogger)

Description

High puncture-resistant PVC safety boot With slip resistance and a steel toe cap and midsole Waterproof, antistatic and provides comfort with heel energy absorption Prevents build-up of static electrical charges and ensures that they are discharged effectively.

Heavy duty gumboots

Description

High quality, sturdy PVC gumboots Suitable for industries & construction sites. Waterproof Nylon-Cotton Lining

White PVC Boots

Description

Built for tough food and hospitality environments, this PVC safety boot offers steel toe protection, slip and puncture resistance, and full waterproof coverage for all-day safety and comfort.

Arm & Hand Protection

Arm and hand protection is essential in the hospitality, food and travel industry, where staff regularly handle hot surfaces, sharp tools, cleaning chemicals, and food items. Proper protection helps prevent burns, cuts, abrasions, and contamination, supporting both worker safety and food hygiene.

CUT PROTECTION

Description

These gloves are designed with cut resistant materials (e.g., Kevlar, HPPE) to protect users from sharp tools, blades, or metal edges.

HEAT-RESISTANCE

Description

Heat-resistant oven mitts and gloves used in baking and cooking.

DISPOSABLE GLOVES

Description

Disposable gloves for handling ready-to-eat foods to prevent cross-contamination.

CHEMICAL RESISTANT GLOVES

Description

Chemical-resistant gloves used by cleaning crews working with detergents, sanitizers, and degreasers.

LONG-SLEEVED PROTECTIVE SLEEVES

Description

Disposable anti-static chemical protective cuff 3PB type waterproof with good support

VENI-FISH

Description

Very comfortable multi-standard chemical glove with a very rough palm for excellent grip when handling acids

Other examples

DRIVERS GLOVES

Description

Premium quality fleece lined leather drivers glove with for added warmth and comfort. Keystone thumb provides an improved fit.

DIAMOND GRIP GLOVES

Description

Polycotton Shell with natural latex coated palm and fingers. Lightweight for maximum dexterity and comfort with sensitivity.

DISPOSABLE GLOVES

Description

Disposable gloves for handling ready-to-eat foods to prevent cross-contamination.

PVC KNITTED GLOVES

Description

Mechanic gloves with studs or PVC polka dots for better grip Great lightness for optimal dexterity

COLD ROOM GLOVES

Description

Cold room gloves protect workers' hands from freezing temperatures during food storage, handling, and transport in cold environments.

WELDING GLOVES

Description

Welding gloves provide vital heat and abrasion protection for maintenance staff in hospitality, food, and travel facilities, especially during repair or fabrication tasks involving high temperatures or sharp materials.

BODY PROTECTION

In hospitality, food , and travel industry, protective workwear, especially hygiene-compliant and slip-resistant clothing is essential. It ensures safety in fast-paced environments such as commercial kitchens, food processing areas, and catering events. From water-resistant aprons to non-slip footwear and hairnets, this gear enhances hygiene standards while protecting workers from industry-specific hazards like spills, sharp tools, hot surfaces, and wet floors. In lower-risk areas, standard uniforms with hygienic materials and light safety features may still provide sufficient protection and comfort.

FIRE HAZARD PROTECTION

In the hospitality , food , and travel industry, protective workwear, especially hygiene-compliant and slip-resistant clothing is essential. It ensures safety in fast-paced environments such as commercial kitchens, food processing areas, and catering events. From water-resistant aprons to non-slip footwear and hairnets, this gear enhances hygiene standards while protecting workers from industry-specific hazards like spills, sharp tools, hot surfaces, and wet floors. In lower-risk areas, standard uniforms with hygienic materials and light safety features may still provide sufficient protection and comfort.

FIRE EXTINGUISHERS

Used to quickly suppress small fires before they escalate into major hazards.

FIRE BLANKETS

Smother flames on people or small equipment by cutting off the oxygen supply.

GASS DETECTORS

Continuously monitor and alert workers to the presence of flammable or toxic gases.

SCBA

Provides clean, breathable air in environments with smoke, gas leaks, or low oxygen levels.

SMOKE DETECTORS

Detect the early presence of smoke, providing crucial warnings to initiate timely evacuation or fire suppression.

FLAME-RESISTANT (FR) CLOTHING

Protects workers from burns and injuries caused by flash fires or electric arcs.
