

**Zocom Limited.**

# **ESSENTIAL PPE FOR AGRICULTURAL SAFETY**

***WE BELIEVE IN KEEPING YOU SAFE***

At Zocom Limited, we don't just supply quality products. We are a great resource for knowledge to help you achieve a SAFER and HEALTHIER working environment which for you means – minimised lost time incidents, managed operational risk to secure your business continuity.

# AGRICULTURE SECTOR

Protecting the Hands that Feed Us

Agriculture is the backbone of our economy and the heartbeat of our communities. It provides food, employment, and raw materials for countless industries. Yet, behind every harvest and every yield are hardworking individuals exposed daily to a range of occupational hazards. From harmful chemicals and dust to sharp tools and unpredictable weather conditions. That's where Personal Protective Equipment (PPE) comes in.

PPEs are essential in agriculture to protect workers from harmful chemicals, physical injuries, and respiratory hazards. They also prevent the spread of zoonotic diseases and shield workers from harsh environmental conditions. By ensuring safety, PPEs boost productivity and support compliance with health regulations.

**At Zocom Limited, we are committed to safeguarding those who sustain us. Our specialized range of PPE for the agricultural sector is designed to ensure safety, comfort, and durability empowering farmers, field workers, and agribusiness teams to perform their best while staying protected.**

## Other Industries We've Served:

- Energy Power
- Oil & Gas
- Construction & Engineering
- Manufacturing & Industrial Plants
- Transport & Logistics
- Healthcare & Hospitals
- Government & Public Institutions
- Education & Research Institutions
- Retail Outlets
- Corporate Facilities
- Travel and Hospitality

# About Us

---

## **1995 - The Beginning**

Zocom Ltd was established to deal with general supplies, marking the start of our journey in the safety industry

## **2001 - Specialization**

Recognizing an urgent need in occupational health and safety, we dedicated ourselves to providing professional safety solutions

## **Present - Growth and Excellence**

Today, we've expanded our operations with more staff and enhanced systems, becoming a leader in safety equipment distribution

# Our Mission

---

To provide top-quality safety solutions while maintaining the highest standards of professionalism and customer service in the industry.

# Why Choose Us

---

- 01** Over 20 Years of Industry Experience
- 02** East & Central Africa Coverage
- 03** Expertise in Occupational Health & Safety
- 04** Trusted by Leading Organizations
- 05** Partnership with Global Brands
- 06** Customer-Centric Approach
- 07** Compliance with Global Standards
- 08** Comprehensive Safety Solutions

# Head Protection

---

Head protection is crucial in agriculture for several important reasons:

1. Preventing Injuries from Falling Objects: Farmers often work around trees, machinery, and stacked materials. Protective headgear helps prevent serious injuries from falling branches, tools, or other debris.
2. Protection from Machinery: Agricultural machinery like harvesters, tractors, and equipment have moving parts and can cause head injuries if not handled carefully. Helmets can reduce the impact in case of accidents.
3. Shielding from Environmental Hazards: Sun exposure can cause heat stroke and sunburn. Some head protection, like wide-brim hats or helmets with visors, also protect from harmful UV rays and reduce overheating.
4. Reducing Impact from Slips and Falls: Uneven terrain, wet surfaces, or climbing ladders increase the risk of slips and falls. Wearing head protection cushions impacts and can prevent concussions or skull fractures.
5. Protection from Chemical Exposure: When spraying pesticides or handling chemicals, protective headgear can prevent harmful substances from contacting the scalp or face.
6. Compliance with Safety Standards: Many agricultural workplaces require protective headgear as part of their safety protocols to minimize workplace injuries and maintain compliance with occupational health regulations.

## Our Head Protection Gears

We stock a wide range of head protection gear designed to meet the safety needs of agricultural workers and ensure compliance with industry standards.

**Balaclava**

**Helmet**

**Welding shield**

**Security jembe caps**

**Hair nets re-usable**

**Disposable hairnets**

## Other Head Protection Accessories

Head Protection Accessories enhance the safety and functionality of helmets by providing added comfort, visibility, and protection in diverse work environments.

**Hard Helmet with Affixed Light**

**Visor**

**Helmet Lights**

**Welding Helmet**

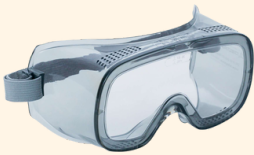

**Helmet with earmuffs and goggles**

# Eye And Face Protection

Appropriate eye protection must be provided in agricultural settings where there is a risk of injury from flying debris, dust, chemical sprays, fertilizers, harmful vapors, or exposure to intense sunlight or UV radiation.

## Delta plus Muriah 1 goggles

### Description

Clear-lens safety goggles with direct ventilation Extra soft nose bridge for an optimised comfort and perfect fit for all body types Clip closure at the back with textile elastic for an Easy to set-up and remove Extra flat temples for optimal comfort with Ear muffs

## Delta plus galeras goggles

### Description

Frame with clear lenses compatible with corrective lenses Flexible nose bridge for optimal comfort and compatible with all morphologies Extra-flexible nose bridge for optimal comfort and a perfect fit for all morphologies Forked headband for low, consistent pressure without compromising comfort Light and robust, resistant to bending and twisting

## RUIZ 1

### Description

These safety goggles feature a clear polycarbonate lens for high-impact protection and a wide field of view, combined with a durable grey PVC frame and elastic textile headband for a secure, comfortable fit. Designed in a monoblock style with straight characteristics, they offer excellent compatibility with ear protection and are ideal for extended use in various work environments.

## Brava 2

### Description

Lightweight and robust, resists bending and twisting Extra flat temples for optimal comfort and less pressure Extra flat temples for optimal comfort with Ear muffs Molded nose piece for an economic solution

# Respiratory Protection

## Dust Mask

### Description

Dust masks protect against airborne particles such as dust and powders and are commonly required in construction, agricultural, and pharmaceutical work. These single-use masks cover the mouth, nose, and chin only.

### Protection

Dusts/fibers - Solid particles from crushing, cutting, sanding e.g. Cement dust, Sulphur, coal, wood dust, asbestos, cotton dust, clay, ferrous metals (steel, stainless steel, cast iron).

## Half-Face Mask

### Description

Available as a half-face (covering nose, mouth and chin) or full-face mask (covering eyes, nose, mouth and chin). This type of respirator cleans contaminants from the air via cartridges and/or filters before the air is inhaled by the wearer.

### Protection

All dust mask protections plus Oil based Mists, Fumes, Gases & Vapours

## Full Face Mask

### Description

Offers higher protection level using hazard-specific filter cartridges for particulate contaminants, gaseous contaminants or a combination filter for both particulate and gaseous contaminants.

### Protection

All dust mask protections plus Oil based Mists, Fumes, Gases & Vapours

## KN95 MASK

### Description

The KN95 Surgical Medical Mask offers 95% filtration efficiency with a lightweight, breathable mesh design. Certified by FDA and CE, it ensures a secure, comfortable fit with an adjustable nose clip and anti-fog protection.

### Protection

Protects against airborne particles including dust, bacteria, viruses, smoke, and pollen, filtering at least 95% of particles  $\geq 0.3$  microns for reliable respiratory protection.

## DISPOSABLE MASK

### Description

This anti-dust, anti-pollution face mask is designed for everyday use, offering reliable protection against airborne particles. It features a built-in nose pin for a snug, comfortable fit and is recommended for up to 8 hours of use before disposal. Lightweight and easy to wear, it's ideal for both indoor and outdoor environments.

### Protection

Protects against dust and air pollution, making it ideal for everyday use. Features a nose pin for a secure fit; recommended for up to 8 hours of use before disposal.

## DISPOSABLE MASK WITH VALVE

### Description

Adjustable nose clip, high-efficiency exhalation valve, hygienic individual packaging, and optional DOLOMIA test for extended wear time.

### Protection

Protects against harmful gases, chemical vapors, dust, smoke, and biological hazards. Also shields eyes from splashes, fumes, and airborne particles for full-face safety.

# Ear Protection

Exposure to high noise levels can cause hearing loss or impairment. It can create physical and psychological stress. There is no cure for noise-induced hearing loss, so the prevention of excessive noise exposure is the only way to avoid hearing damage. Specifically, designed protection is required, depending on the type of noise encountered and the auditory condition of employee.

## Ear Muffs

Suppress unwanted noise by completely covering the outer ear. Styles come with a variety of features from adjustable headband to hard hat attachments to suit individual needs. Earmuffs need to make a perfect seal around the ear to be effective.

### FEATURES

- **Full Ear Coverage:** Provides comprehensive protection by enveloping the entire outer ear.
- **Adjustable Headbands:** Ensures a snug fit for various head sizes, enhancing comfort and effectiveness.
- **Compatibility:** Available in styles that can attach to hard hats, catering to diverse workplace requirements.
- **Cushioned Ear Cups:** Enhances comfort during prolonged use, reducing pressure on the ears.

### NOISE REDUCTION RATINGS

Noise Reduction Ratings  
Earmuffs are rated based on their ability to reduce noise, measured in decibels (dB):

- **Noise Reduction Rating (NRR):** Used primarily in the U.S., indicating the level of noise attenuation.
- **Single Number Rating (SNR):** Common in Europe, providing a single value to represent the ear muff's effectiveness

For instance, the 3M Peltor X5A Over-the-Head Ear Muffs offer an NRR of 31 dB, making them suitable for environments with noise levels up to 110 dB.

### STANDARD COMPLIANCE

Earmuffs should comply with international standards to ensure reliability and safety:

- **EN 352-1:** European standard specifying requirements for earmuffs.
- **ANSI S3.19:** American standard outlining methods for measuring hearing protection.

## Protection Levels

The effectiveness of earmuffs depends on their SNR/NRR ratings and the ambient noise levels:

Ambient Noise Level (dB)	Recommended SNR (dB)	Estimated NRR (dB)
85	9-14	6-10
90	14-19	10-14
95	19-24	14-17
100	24-29	17-21
105	29-34	21-25
110	34-39	25-30

Selecting earmuffs with appropriate ratings ensures that noise exposure is reduced to safe levels, typically between 75-80 dB.

### Our samples

 <p><b>Interlagos earmuffs</b></p> <p>Provides sound reduction of up to 24dB Double headband for increased flexibility and comfort during long periods of use Synthetic foam cushioned pads to ensure maximum comfort, whilst minimizing noise exposure</p>	 <p><b>SPA 3 earmuffs</b></p> <p>Delivers 23db of noise reduction Features polystyrene and synthetic foam cups that offer low pressure comfort fit on the ears Headband made of durable ABS plastic that is height adjustable</p>
--	---

## How to Choose the Correct Ear Muff Style

Is a helmet required? If so, select a cap-mounted ear muff. Make sure that the hard hat you choose has universal slots that can be used in combination with the selected ear muff. Do you need to wear a full brim helmet, bump cap or a hat for sun protection?

Zocom Limited.

WE BELIEVE IN KEEPING YOU SAFE

## Disposable Ear Plugs

---

Disposable ear plugs protect against harmful noise by reducing sound levels and preventing hearing damage. They must fit snugly and comply with standards like EN 352 or ANSI S3.19, with ratings such as SNR or NRR for effectiveness.

Example:

Delta Plus CONIC200JA disposable foam earplugs offer an SNR of 36 dB and conform to ANSI S3.19-1974. Made of soft polyurethane, they are individually packed for hygiene and ideal for industrial noise protection.

## Reusable Ear Plugs

---

Pre-molded silicone ear plugs are reusable, washable, and designed for a snug fit. They come in corded or uncorded options and are stored in resealable cases for hygiene and convenience.

Example:

Delta Plus JETSTOP01 silicone ear plugs offer reusable, corded protection with an SNR of 25 dB, packaged in a resealable case for easy storage and cleanliness.

---

***Safeguard your hearing today to stay safe, alert, and sound tomorrow.***

# Foot Protection

Foot protection safety involves using appropriate footwear and accessories to safeguard against workplace hazards that could injure the feet. This includes a variety of footwear types, such as safety boots, shoes, and overshoes, each designed for specific risks like falling objects, sharp objects, chemicals, heat, and slippery surfaces.

## Our Foot Protection Collection

### Security Boot

#### Description

Breathable full-grain cowhide leather  
Moisture-wicking, & washable Energy  
absorbing heel Steel toe cap protection tested  
to 200 joules impact

### Safe Toe safety boot S3

#### Description

High quality water resistant cow leather Breathable  
lining sandwich air mesh Heavy Duty outsole PU/PU  
dual density Steel Toecap and steel midsole plate  
Standard: CE EN ISO 20345:2011 S3 SRC

### Safety Jogger best boy

#### Description

Barton action leather upper Mid-cut S3 safety  
shoe with a steel midsole and toecap The slip  
resistant outsole (SR) provides good grip The  
outsole is resistant against oil and fuel

### Bata Heavy duty gumboot

#### Description

High-quality, durable  
PVC gumboots  
designed for  
agricultural work,  
featuring waterproof  
nylon-cotton lining for  
all-day comfort and  
protection.

### Bata lightduty gumboot

#### Description

Injection-molded, fully  
waterproof boots with  
flexible, abrasion-  
resistant soles  
designed for comfort  
and durability in  
farming and  
agricultural work.

### Kenafri heavyduty gumboot

#### Description

Sure! Here's a  
rephrased version:  
Durable, high-quality  
PVC gumboots ideal  
for agricultural use,  
equipped with a  
waterproof nylon-  
cotton lining to ensure  
comfort and  
protection throughout  
the day.

### Bata lightduty gumboot

#### Description

High-quality, durable  
PVC gumboots  
designed for  
agricultural work,  
featuring waterproof  
nylon-cotton lining for  
all-day comfort and  
protection.

# Arm & Hand Protection

Hands are two the most valuable and widely used tools in the workplace. Burns, cuts, electrical shock, amputation and absorption of chemicals are examples of hazards associated with arm and hand injuries. A wide assortment of gloves, hand pads, sleeves, and wristlets for protection from these hazards is available.

## GRADING GLOVES

### Description

Designed for handling and sorting produce; they offer good grip and prevent bruising of delicate fruits while protecting hands from minor cuts and abrasions.

## PICKERS GLOVES

### Description

Lightweight and flexible; protect hands during harvesting from thorns, rough branches, and blisters while maintaining dexterity.

## DELTA PLUS WINTER GLOVES

### Description

Insulated for cold weather; keep hands warm and functional during chilly outdoor tasks, preventing frostbite and cold-related injuries.

## MIDAS COLDROOM GLOVES

### Description

Specifically designed for use in cold storage; offer thermal protection while allowing grip and movement in freezing conditions.

## RIGGER GLOVES

### Description

Durable and reinforced; ideal for heavy-duty tasks like loading, digging, or fencing by protecting hands from impact, splinters, and rough materials.

## RUBBER GLOVES

### Description

Waterproof and chemical-resistant; used during spraying or cleaning tasks to protect skin from harmful substances.

### PVC CHEMICAL GLOVES

#### Description

Provide robust protection from hazardous chemicals and acids; ideal for spraying or handling agrochemicals.

### POLKA DOT GLOVES

#### Description

Cotton gloves with PVC dots for extra grip; ideal for light agricultural tasks requiring good handling and breathability.

### WELDERS LEATHER GLOVES

#### Description

Heat and flame-resistant; used in welding or metalwork on farms to protect hands from burns, sparks, and heat exposure.

### CUT RESISTANCE GLOVES

#### Description

Made with cut-proof materials; safeguard against injuries from sharp tools, blades, or thorny plants.

### DIAMOND GRIP GLOVES

#### Description

Feature a textured surface for superior grip in wet or oily conditions; ideal for handling tools or machinery.

### NITRILE GLOVES

#### Description

Chemical-resistant and latex-free; protect against oils, pesticides, and contaminants during handling or application tasks.

# Body Protection Garments

In the agriculture sector, workers are regularly exposed to harsh weather, chemicals, dust, physical strain, and sharp tools. To ensure their safety, health, and productivity, it is essential to equip them with the right protective garments. These garments are specifically designed to shield the body from potential hazards such as chemical spills, extreme temperatures, abrasions, and environmental elements. From spray suits and raincoats to overalls and aprons, each item serves a unique purpose in safeguarding agricultural professionals as they carry out their daily tasks in the field or farm.

## 1. Raincoat with Lining –

Waterproof outerwear with inner insulation; keeps the body dry and warm during wet farming conditions.

## 2. Dustcoat, Tetrex Fabric –

Lightweight, breathable coat that shields the body from dust, dirt, and light splashes during general farm work or grading tasks.

## 3. Overall, Tetrex Fabric –

Durable and lightweight full-body cover used for general protection from dust, abrasions, and minor chemical contact.

## Other Body Protection Garments

4. **Overall, Drill Fabric – Heavy-duty**, tightly woven fabric coverall offering enhanced durability and protection for tough agricultural tasks.

5. **Eskimo Suit (Blanket Lining) –** Cold-weather garment lined with blanket material; keeps the body warm during early morning or high-altitude farm work.

6. **Eskimo Suit (Sponge) –** Insulated with sponge material; provides warmth and comfort in cold environments while allowing flexibility.

7. **Welder's Overall, Twill Fabric – Flame-** and heat-resistant overall for agricultural welding and metalwork; protects against sparks and heat.

## Other Body Protection Garments

8. **Spray Shorts, Tetrex** – Lightweight and chemical-resistant shorts worn during lower-body exposure tasks in spraying, offering ventilation and protection.

9. **Woolen Sweater, Turtle Neck Warm** – Provides warmth during cold seasons in open farm environments, maintaining body heat.

10. **PVC Apron** – Waterproof apron protecting the front body from water, mud, and light chemical splashes during mixing or cleaning tasks.

11. **Heavy Duty Delta Plus PVC Apron** – Thick, industrial-grade apron for high-risk chemical handling, protecting from acid burns and harsh substances.

## Other Body Protection Garments

12. **Reflector Vest Leo** – Lightweight, high-visibility vest for daytime fieldwork to enhance safety by ensuring the wearer is easily seen.

13. **Reflector Vest Protector** – High-visibility vest with extra padding and durability for nighttime or high-traffic agricultural environments.

14. **Askari Sweater** – Military-style wool sweater providing warmth and a professional look for farm guards or field supervisors.

15. **Spray Suit** – Full-body chemical-resistant suit designed to protect farmers from harmful pesticides and chemical exposure during spraying operations.

Zocom Limited.

WE BELIEVE IN KEEPING YOU SAFE

# Chemical Aprons & Hazmat Suits

---

Handling small quantities of low-risk chemicals may only require an apron or smock protecting against accidental splashes. Larger quantities of chemicals or risks of contact with airborne contaminants, chemical sprays or jets are likely to require full body suits or coveralls.

# Spill Containment

---

Be prepared in case of spills of hazardous substances such as chemicals, fuels, lubricants, and coolant with these spill kits which contain any necessary control materials, neutralizers and personal Protection.
